Produced for the White Cross Insurance Association Ltd. by Geographia Ltd, both of London UK. This book contains 64 full coloured maps and war graves index of over 1,700 cemeteries on the Western Front. The date has always been a question, but is now believed to be circa 1920.

The print version of the book is difficult to use, given that the original index was alphabetic and many of the cemetery numbers on the maps were difficult to read. If you wanted to find a particular cemetery, on the basis of the cemetery number, it was necessary to scan through the index manually to see if you could find that number.

To enhance the digitization of this book, members of the [Great War Forum](https://www.greatwarforum.org/) undertook to digitize the print index into an Excel Workbook, which then could be used to search for the cemetery of interest by name, page number, map square or map number. That file was added to the digitized version of the book on [Archive.org](https://archive.org/). In the last step, a PDF version was also prepared for those that may not have Excel, which has the four (4) tabs of the Excel worksheet printed in separate documents:

- Original
- Alphabetic
- Numeric
- Page Number plus Map Square
