

Emergency Traffic Cones

Safe Lanes Systems Collapsible

Safety Cones, 28" in height with a standard 14" x 14" square base (modified when manufactured for use in The Kone General™ Automatic Cone Dispenser System to app. 10"x10"). Unlike a traditional PVC traffic cone, our Emergency Traffic Cone is self-deploying and collapsible. They are made to provide a safer driving and work experience. They weigh half of what standard PVC cones weigh and they are effortless to carry and deploy. Safe Lanes Emergency Traffic Cones swiftly deploy letting other drivers know there is a possible emergency or pedestrians ahead.

Emergency Traffic Cones – Why we're better

Unlike a traditional PVC traffic cone, our Emergency Traffic Cone is self-deploying and collapsible. They are made to provide a safer driving and work experience. They weigh half of what standard PVC cones weigh and they are effortless to carry and deploy. Safe Lanes Emergency Traffic Cones swiftly deploy letting other drivers know there is a possible emergency or pedestrians ahead. Most injuries on the highway actually occur outside of the vehicle! Our cones are a step above due to their resilience and endurance. Emergency Traffic Cones take an impact and quickly spring back into position. No more blown over cones! Safe Lanes Cones are more cost effective and functional than a basic traffic cone, but what really makes them unique is just how efficient our emergency traffic cones are. They pick up the slack that standard cones leave behind.

Emergency Traffic Cones are compact

These small traffic cones are attractive, durable, and useful for many purposes such as, soccer fields, vehicle training, industrial safety, and much more. This small and convenient bundle is an perfect application for a variety of work and utility vehicles or trucks including emergency drivers. Perfect also for any application that could benefit from the increase in storage space gained by acquiring any one of Safe Lane's cone systems. Spring Cones take up a fraction of the space of normal PVC cones. Our four cone tote can collapse to fit into a 15"x15"x6" space. When you purchase a Safe Lanes Traffic Systems you can have a peace of mind knowing that they are ready when you need them in a flash.
